

Senior Android Developer

DESCRIPTION

CellPoint Mobile, a leading provider of omnichannel payment and commerce solutions to global clients, is experiencing tremendous growth and seeing an experienced Android Developer who can create high quality applications for the Android platform. Ability and willingness to constantly upgrade technical skills, willingness to proactively take ownership, high quality focus, and a penchant for elegant design are must. A working knowledge of transportation and payment system standards is beneficial.

RESPONSIBILITIES

- Deliver functionally elegant and performance-optimized Android apps to customers and end users.
- Bring vision to the team in the form of new technology recommendations and approaches.
- Assist the client support team using your technical background.
- Working with cross-platform team members to coordinate, and in some cases drive, feature functionality and implementation.
- Collaborate with designers and project managers to create UX-oriented and first class solutions.
- Engage and participate in defending strong APIs and integration against middleware services.

REQUIREMENTS

- Minimum of 3 years development experience with the Android SDK, Java, Kotlin and Android Studio.
- Experience working with RxJava and design architectures like Redux and MVVM.
- Familiarity working with Git version control in a collaborative team environment, creating pull requests and performing code reviews.
- Have contributed to at least 1 application in the Google Play Store.
- Experience working with Google support libraries.
- Experience building web applications.
- Experience writing clean, reusable and testable code.
- Excellent communication skills, go-getter attitude and the ability to work independently.
