

Performance Test Lead
India, Pune
October 2018
Full-time

A Career Opportunity with CellPoint Mobile (www.cellpointmobile.com)

CellPoint Mobile (CPM), a provider of enterprise software and services to the transportation industry, is seeking a Performance Test lead to fuel the company's growth and expansion. We are a dynamic and fast-growing solutions specialist in commerce orchestration, eWallets and digital payments, providing e-commerce and payments services to airline, rail and road transportation companies across the globe.

Position Overview

We are actively recruiting a Performance Test Lead. The candidate should exhibit hands-on expertise in performance testing, and an expert in designing and defining test frameworks. We are seeking a candidate who will maintain the highest level of quality in our deliverables through continuous testing of non-functional aspects of products and benchmark them.

This position is for someone who is hands-on with planning, writing and executing scripts.

We have immediate, full-time openings in our Pune, India, location. Travel may be required. CellPoint Mobile offers a competitive package and the opportunity to solve IT challenges for partners and projects around the globe with a team that is shaping the future of commerce orchestration and digital payments.

Key Responsibilities & Qualifications Required

The ideal Performance Test Lead candidate will have the following skills and characteristics:

- 8+ years Quality Assurance or related experience
- Strong positive attitude and a demonstrated ability to accomplish complicated projects with confidence
- A start-up mentality
- Demonstrated ability to creatively and proactively solve problems
- Excellent communication skills
- Experience working on eCommerce projects

- Ability to learn quickly and work efficiently
- Must be a team player with the ability to manage multiple tasks in a deadline-driven environment
- A strong work ethic
- Highly organized with a keen attention to detail
- Proven written and verbal communication skills (English)
- Strong computer skills
- College degree or equivalent experience required

Specific Technical Requirements & Skills needed

- Collaborate with the client and functional SMEs to capture average and peak transaction volumes
- Design test scenarios at peak volume.
- Design data preparation approach.
- Manage performance testers' work throughout data preparation activities and performance test execution
- Measure and monitor progress during each performance test run to address any errors occurring during the test
- Ensure that the team follows the performance testing standards, guidelines, and methodology as specified in the performance testing approach
- Analyze the performance test results to identify any potential performance enhancements
- Review the performance test results with the client in status meetings and recommend courses of action regarding any areas that do not meet SLAs
- Log and close out any performance related defects
- Ensure the application meets agreed upon SLAs at the end of the performance test
- Work with the application and technical architecture teams to ensure a stable environment in which to run performance tests, including isolation, concurrency, soak, and stress tests
- Work with the technical architecture team to configure and instrument performance test tools in the performance test environment in order to conduct a performance diagnostic analysis
- Work with the application and technical architecture teams to address and fix performance bottlenecks and inefficiencies

Work Location: Pune, India
